Nova AI -- Company Overview

Mission & Vision

Nova AI is on a mission to democratize artificial intelligence by building tools that make machine learning accessible, reproducible, and impactful for every organization. We envision a world where AI-assisted decision-making is as standard as spreadsheet analysis.

History

Founded in 2023 by Dr. Elena Vasquez (CEO) and Marcus Chen (CTO), Nova AI emerged from research at Stanford's AI Lab. The company secured $12M in seed funding from Amplify Partners in early 2024 and launched its first product, Nova Interview, in Q3 2024. As of 2026, Nova AI serves over 800 enterprise customers across North America, Europe, and APAC.

Core Values

- Transparency -- Every decision, model, and metric is documented and auditable.
- Excellence -- We hold ourselves to the highest standards of engineering and ethics.
- Inclusivity -- Our products are designed for diverse teams and global audiences.
- Innovation -- We invest 20% of engineering time in exploratory research.

Product Lineup

Nova Interview -- AI-powered technical interview platform with real-time voice, code evaluation, and structured scoring.

Nova Assess -- Automated skills assessment for pre-screening candidates at scale.

Nova Learn -- Adaptive learning paths generated from interview gap analysis.

Nova Insights -- Analytics dashboard for hiring teams to track pipelines and trends.

Key Statistics (2026)
